To whom it may concern:

The American Society of Mammalogists is a not for profit organization incorporated in Topeka, KS with a mission to advance the field of mammalogy through research, education and conservation. As part of the mission of the American Society of Mammalogists, small grants are awarded to support students, postdoctoral scholars, and early career investigators engaged in research on mammals.

The Board of Directors of the American Society of Mammalogists have discussed “eligible charges” for the financial support provided by the Society and it is the Society’s intention that the entire award be used to advance mammalian research. Thus, the American Society of Mammalogists does not view Facilities & Administration charges (“indirect” or “overhead”) as an eligible charge against these awards.

Please let me know if you need additional information.

Best regards,

Matthew E. Hopton, PhD
Secretary-Treasurer
American Society of Mammalogists
