

## Mammal Images Library Committee

**Committee Members:** B. Blood, E. J. Finck (Business Manager), C. P. Groves, L. E. Harding, M. E. Hopton, D. G. Huckaby (Chair), B. Huffman, J. Kulahci, J. A. Lackey, L. L. Master, J. S. Scheibe, B. P. Tanis, B. M. Zinke.

### **Mission:**

The American Society of Mammalogists first established the Mammal Slide Library in 1977 to provide low-cost slides of mammals principally for educational purposes (Gill and Wozencraft, 1994). The name change to Mammal Image Library reflected changes in ways images of mammals are now stored and accessed. The Mammal Images Library is a nonprofit educational program of the American Society of Mammalogists with the goal of providing images of mammals for use in education worldwide. At the start of 2012 the library contained over 1700 digital images representing 28 of 29 orders, 125 of 153 families, and 1038 of 5416 species recognized in Wilson and Reeder (2005). The images also represent all continents. More than 110,000 images are in use in more than 50 countries. In addition to optical projection for nonprofit instruction, many of the images may be employed (with permission) for other purposes, including commercial uses.

### **Information Items:**

(1) The primary focus of the MIL Committee continues to be making available individual images. The table below compares the number of images sent and other information for the past ten years. The numbers of images sent do not include those low-resolution images downloaded directly from the library on the ASM website, of which we have no record. Signed copies of the 2013 Business Report were sent to the ASM Treasurer.

(2) The MIL collection consists both of images digitized from slides at a resolution of 4000 dpi and those taken originally as digital images of various resolutions. A lower-resolution preview of each image of generally 660 x 440 pixels at 150 dpi, suitable for some projection or web use, is available on the MIL web page free of charge and without requiring permission. A copy of the higher resolution image, with or without the label (layer), is available upon request for most of the library, although we usually charge a royalty of \$50 each for commercial usage. We normally charge a \$5 handling fee for each high resolution image sent for non-commercial purposes.

(3) During 2013, we added 140 new images to the MIL collection. Among these are 37 species and 15 genera new to the collection (see third page). They include one genus and three species described new since Wilson and Reeder (2005).

(4) The Committee initiated a program during 2012 of requesting the photographers who supply images for the cover of the *Journal of Mammalogy* and those used in the *Mammalian Species Accounts* to contribute them to the library. Some have complied.

(5) Starting in 2012, each week we post a mammal image of the week on Facebook, Google+, and Twitter (search for #WeeklyMammal and #ASM\_image on our social media accounts).

(6) The MIL collection still lacks images of one of the 28 orders, 21 of the 153 extant or recently extinct families, and ca. 80% of the 5416 species (pages 4-8 below) recognized in Wilson and Reeder (2005). We encourage all interested parties to consider contributing their high-quality images to the MIL. Please take a few minutes to review our holdings on the MIL web page to determine if some images from your personal collection could improve the scope and quality of the collection. Anyone interested in submitting images should contact the Committee Chair.

(7) The Committee thanks Fort Hays State University for supporting the Business Office of the Mammal Images Library and for funding student support.

(8) During 2013, R. Larsen and S. K. Lyons left the Committee, and B. Huffman and B.M. Zinke joined the Committee.

(9) On 12 June 2012, the Committee transferred 90% of its funds (\$6400) to the general fund of the ASM. Although in the past the Committee operated somewhat independently from the ASM board, future expenditures will be authorized by the Board of Directors as they are for other committees. The greatly reduced account balance shown below reflects that transfer.
